EDUCATION

2023-2027

SASI ENGINEERING COLLEGE

- Information Technology

2021-2023

GREYFRIARS JR COLLEGE

- MPC
- Percentage 9.4/10

SKILLS

- Programming: Python, Java, C, C++
- Web: HTML, CSS, JavaScript
- Database: MySQL
- Tools: Git, Canva, Flutter (basic)

LANGUAGES

- English
- Telugu

CERTIFICATIONS

- *National Level Online Workshop on Application Development with AI and Essential Skills – Certificate of Participation*
- *Participated in a national-level workshop focused on AI-based application development and essential technical skills.*
- *Learn C++ – CodeChef*
- *Issued October 18, 2025*
- *Completed all lessons and projects demonstrating proficiency in C++ programming.*
- *Certificate Verification – ID: 022a8d2 | Username: anushapanepalli*
- *Introduction to C++ – SoloLearn*
- *Issued July 2025*
- *Gained practical knowledge of C++ fundamentals including variables, loops, functions, and OOP concepts.*
- *Networking Basics – Cisco Networking Academy*
- *Issued July 29, 2025*
- *Learned fundamental networking concepts such as IP addressing, protocols, and network troubleshooting.*
- *Operating Systems Basics – Cisco Networking Academy*
- *Issued January 25, 2025*
- *Understood core operating system functions, process management, and file system organization.*

ANUSHA PANEPALLI

INFORMATION TECHNOLOGY

PROFILE

“Motivated and detail-oriented Information Technology student with strong problem-solving skills and hands-on experience in projects like Brain Tumor Detection and Fake News Detection Chatbot. Seeking an entry-level opportunity to apply technical skills and contribute to organizational growth while continuously learning new technologies.”

PROJECTS

Library Management App (Flutter)

- Designed and developed a mobile application using Flutter for managing library operations. Implemented features like book search, issue/return tracking, and student login.
- Integrated Firebase database to store and manage books and student records in real time.

Fake News Detection (Python, NLP)

- Built a machine learning model using Python and Natural Language Processing to classify news articles as real or fake. Improved accuracy through data preprocessing and model training.

Agri Chatbot (Python)

- Developed a chatbot to provide farmers with instant solutions for crop-related queries. Integrated NLP to answer questions related to agriculture practices and weather updates.
- Used Dialogflow / NLTK to improve natural language understanding and handle multiple query variations.

WORKSHOPS ATTENDED

- **Power BI Workshop** – Data visualization and dashboard creation.
- **Flutter Workshop** – Cross-platform mobile application development.
- **AR/VR Workshop** – Applications of augmented and virtual reality.
- **Generative AI Workshop** – AI-driven content creation and automation.
